

Dr. Wohlrab
Discharge Summary for Total or Partial Knee

Diet Instructions: Regular

Call provider:

- Temperature greater than 101.5 F
- Redness, tenderness, or signs of infection (pain, swelling, redness, color, or green/yellow discharge around incision site)
- Severe Uncontrolled pain

Dressing – Leave clear dressing on until your post-operative appointment. May begin showering immediately, clear dressing is waterproof.

Do not submerge incision in water such as swimming or tub use.

Do not use ointments on incision, keep clean and dry.

You may use an ice pack to site.

Total Knee – must utilize a walker or cane at all times for 6 weeks
Partial Knee – must utilize crutch, cane or walker at all times until post-operative appointment

You will be on Aspirin 81 MG twice a day for a six week period to prevent deep vein thrombosis (blood clot) for prophylaxis or another blood thinner as discussed at your preoperative appointment.

Post-operative appointment attached with discharge instructions
